AUDIT, COMPLIANCE, PROJECT MANAGEMENT MADE EASY!

WHY BCUBE?

A cloud-based compliance, audit & project management solution that helps you demonstrate compliance to auditors or supervisors. Manage regulatory changes, tasks, policies & procedures, evidence/ documents & audit effectively. Receive notifications for workflow & rule updates.
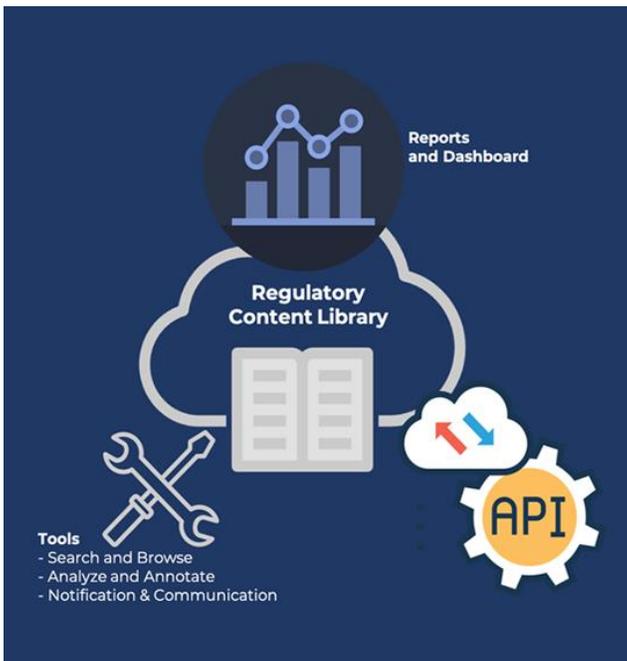

Up-to-date Content Library

The BCube has a fast-growing, up-to-date content library with regulations, guidance, news releases, bulletins, event information & much more - organized by the government agencies, sections & paragraphs. View the current rules, history & perform analysis or research using a single screen display.

Effectively Manage Rule Changes

Receive notifications as the rules change, assign experts to review rule changes, initiate & manage remediation, improve efficiency with a streamlined rule change management process across the organization.

Digitize Audit & Assurance

A digital solution for any kind of audit program with flexible workflow - request lists, questionnaires, deliver document by work papers, capture findings & observations, track responses & remediation with the integrated rule library, policies & procedures, questionnaires, checklists, etc.

Active Policy Management

Link your policies & procedures to the BCube Rule Content Library, get notifications to review & update them as the rules evolve. Perform audits like any other program and stay on top of your organizational rules. Citations for policy management are now a thing of the past.

Dashboards & Reports

Intuitive role-based dashboard & reports help you stay in full control of your responsibilities & make data-driven decisions.

RESTful APIs

Easily customizable to align with your business needs. Use the RESTful APIs to integrate with existing software systems.

Reduce Reputation Risk…!

Reduce violations, lost revenue from non-compliance and government fines with your single source of data to demonstrate compliance and deliver assurance. Increase user productivity with a simple user interface, consistent processes, current & historical projects, tasks & audit.
